

České Budějovice, December 6th 2024

TO WHOM IT MAY CONCERN

The purpose of this letter is to confirm that Victor Alves da Silva Sales, a student of Faculdade Pitágoras, Brazil, has successfully completed the tasks during his internship at the Department of Technology and Cybernetics of the Faculty of Agriculture and Technology of the University of South Bohemia in České Budějovice. The internship lasted from 1st October 2024 to 6th December 2024.

Throughout the cooperation, Victor showed good knowledge and interest in the work. The tasks he performed were related to artificial intelligence and its application in agricultural technology.

Victor completed all tasks conscientiously, carefully and accurately, demonstrating his ability to work independently. I am very satisfied with his work and the results.

During the internship, Victor gained skills and mastered tools for creating basic data sets and processing prediction results from trained convolutional neural network models. Victor spent 376 hours on these research activities.

I would definitely recommend him for any task in this area.

Yours sincerely,

Ing. Mgr. Tomáš Zoubek

Supervisor
