

LETTER OF RECOMMENDATION

Porto, 2 June 2024

To Whom It May Concern,

I am pleased to write this letter of recommendation for Victor Alves da Silva Sales, who was my student in two curricular units of the Erasmus Mundus Joint Master in Artificial Intelligence for Sustainable Societies (AISS) at Universidade Lusófona – Centro Universitário do Porto: “Topics of Machine Learning and its Applications” and “Applied Programming for Data Science.”

Throughout the period during which I followed his academic progress, Victor consistently demonstrated an excellent command of both the theoretical and practical knowledge required by the programme, standing out for his ability to apply that knowledge in real-world contexts and for his keen interest and active participation in classroom discussions. It is worth noting that, whenever asked, he delivered thorough, high-quality presentations covering both the theoretical foundations of machine learning and its practical implementation using Python tools and libraries.

I can attest to his rigour and notable level of commitment, as well as to his strong soft skills, including excellent oral and written communication abilities and a positive interpersonal relationship with his peers. He is a reliable person who honours the commitments he makes.

Based on everything I have observed, I am fully confident that Victor Alves da Silva Sales will make a significant contribution to any environment in which he is placed, whether academic or professional.

I therefore recommend him without reservation. Should you require any further information, I would be glad to provide it.

Sincerely,

Pedro Strecht
